

FILMMAKING SCHOOL

# KIDS CAMERA ACTION!

FOR 7-16 YEAR OLDS

## FAB FILMING APPS!

**STOP MOTION STUDIO – free app for Apple and Android**

<https://www.cateater.com>

This app has some great features, such as letting you add sound effects or voice over. You can adjust how many frames per second you want to use to make it quicker to film, or smoother to watch. And try adjusting the slider to let you view your live photo and the last one you took at the same time – this will be really helpful to make sure you are only making a small move at a time.

**VEESCOPE – green screen app for iPhone or iPad**

**CHROMAVID – green screen for Android**

Set up your own green screen at home and change your background to anything you like. Try filming your own backdrops (think Honey I Shrunk the Kids!) or trying different angles to make it look like you're falling through space!

**ACTION MOVE FX – special effects app for iPhone or iPad**

**FX GURU – special effects app for Android**

See Hollywood effects appear on your own videos! Blow up your house, walk with dinosaurs and play with some fun seasonal tricks too such as Santa's sleigh flying over your roof!
